

Snakebite Relief Program - Training Courses

SRP is currently offering two training courses on snakes and snakebite management, the overall scope is to equip the participants with the knowledge and the practical skills to prevent and manage snake encounters and, most importantly, to know what to do in case of a snakebite.

- The Snakebite Safety Course doesn't include snake handling and exercises with real snakes; it is therefore open to anyone.
- The Safe Snake Handling and Removal Course is for serious and dedicated individuals, it includes some venomous snake handling and therefore is not suitable for people under 18, people with a snake phobia and people with physical disabilities.

Depending on the location and the availability, the courses can be spread out, achieving the total hours of the course in two weeks or a month.

Along with the courses it is possible to buy pre-made first aid kits specific for snakebite and snake handling equipment.

Upon completion of the course, a certificate will be awarded to the participants, and a certification for the business as "snake and snakebite trained".

Handling snakes; practical activity:	Snake handling demonstration from the trainer and practical exercises in different scenario for: Vipers and Pythons Each participant will try to relocate a snake to a bag/bin and release it back.
Handling snakes; practical activity:	Snake handling demonstration from the trainer and practical exercises in different scenario for: Colubrids Each participant will try to relocate a snake to a bag/bin and release it back.

Written and practical final test Closure and certificate ceremony

PRICING

Pricing depends on the number of participants, the location, the language, and the timeframe of the course. Please [contact us](#) for a quote.

Discount is applied for group between 10 to 25 participants to the SSC course.

As our business model is to sustain our no-profit work with communities through the sale of our courses and services we have different pricing for business, NGOs and non-profits.

The revenues from these paid jobs pay for the delivery of humanitarian education to decrease the event of snakebite in Cambodia and support the victims of snakebites and their families.
